

# INNOVATIVE PROJECT

## BARCODE/QR CODE ENCRYPTION

### ABSTRACT:

A barcode or bar code is a method of representing data in a visual, machine-readable form. Initially, barcodes represented data by varying the widths and spacing of parallel lines. Barcode is used to determine not only the price of the product but also to protect companies' rights by preventing copycat. Encryption, in the other hand, is used to make the information unreadable and not forgeable. It is used in trading and political mails also it is used in banks for money transfer. Initially, we convert the data into a barcode which can be read by any scanner.

### SYSTEM REQUIREMENTS :

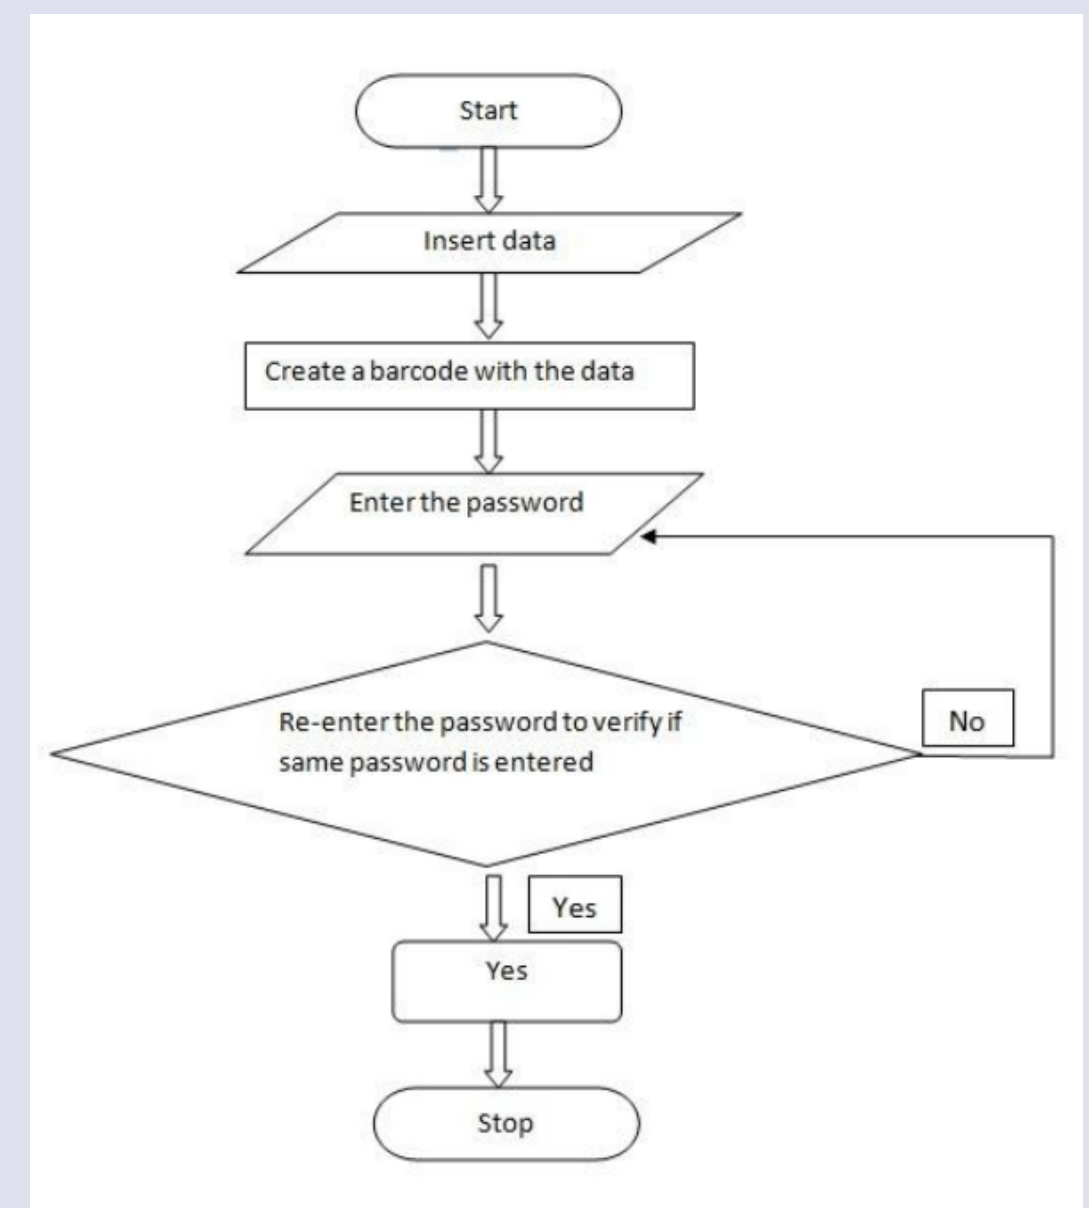

- INTEL i3 Processor
- Window 7/8/10
- 8 GB Ram
- 1 TB Harddisk

### Project Guide:

**MR.K.SHIVA RAMAKRISHNA**

ASST.Professor

### flow charts:

### Presented By:

**Jakka Yashwanth Reddy- 20891A1218**

**Komirishetty Pavan- 20891A1226**

**Konda Rahul- 20891A1227**

**Anugu Akhil Reddy- 20891A1204**

### Conclusion:

The Theme of the project is everyone can hide their data through this qrcode and the users can know the data by scanning the qrcode. It will hide the data in encryption mode no one can find the data without this qrcode.

### Result :

- DEPARTMENT OF INFORMATION TECHNOLOGY

**VIGNAN INSTITUTE OF TECHNOLOGY AND SCIENCE**

Near Ramoji Film City, Deshmukhi (V), Yadadri Bhuvanagiri Dist., Telangana - 508 284.

Approved by AICTE, New Delhi, Affiliated to JNTUH, Hyderabad

**EAMCET CODE : VGNT**

**PGE CET CODE : VGNT1**
